Clearing cache for iPods

Method 2: Manually Clear Up iPod touch Caches

You can clear up iPod touch caches from the device specific settings. It is simple and can be achieved using some few steps. The following steps are applicable for this process.

Clean Safari Cache

1. Go to the "Settings" on the home screen of your iPod touch.
2. Then scroll down till you get to "Safari" and click on it.
3. Scroll down to where you can clear caches. However, it is important to note that depending on the version of your device, it could be named differently. For example, in iOS 8, click on "Clear History and Website Data".
4. Click on "Clear Cookies and Data" again and it deletes the caches. Note that other versions may require you to click on "Clear history and Data" but the outcome remains the same.
5. You can repeat the third and fourth steps to clear the web browser history on your iPod touch.
