

## Disabling Pop Up Blockers/ Turning Off Pop Up Blockers for ANDROID

**NOTE: We do not recommend permanently turning off your blocker.**

Doing so can leave you vulnerable to malicious programs. So either disable the blocker temporarily or add favorite websites to your browser's safe list, so pop-ups will always appear.

### FIREFOX for Android

**Method 6 Firefox on Android**

- 1 around a blue globe.
- 2 Tap the address bar. It's at the top of the screen.
- 3 Enter `about:config` into the address bar. This will take you to the system settings page.
- 4 Tap the "Search" text field. It's in the top-right corner of the screen.
- 5 Search for the pop-up blocker script. Type `dom.disable_open_during_load` into the search bar. This will result in an item labelled `dom.disable_open_during_load` appearing near the top of the screen.
- 6 Tap **Toggle**. It's in the lower-right corner of the `dom.disable_open_during_load` box. Doing so will set this item's value to "false", which you'll see appear in the bottom-left corner of the item's box. This will prevent pop-up windows from being blocked.
- 7 Close and re-open Firefox. Once Firefox is open again, you should be able to view pop-ups.
