

Disabling Pop Up Blockers/ Turning Off Pop Up Blockers for ANDROID

NOTE: We do not recommend permanently turning off your blocker.

Doing so can leave you vulnerable to malicious programs. So either disable the blocker temporarily or add favorite websites to your browser's safe list, so pop-ups will always appear.

FIREFOX for Android

Method 6 **Firefox on Android**

- around a blue globe.
- Tap the address bar. It's at the top of the screen.
- Enter `about:config` into the address bar. This will take you to the system settings page.
- Tap the "Search" text field. It's in the top-right corner of the screen.
- Search for the pop-up blocker script. Type `dom.disable_open_during_load` into the search bar. This will result in an item labelled `dom.disable_open_during_load` appearing near the top of the screen.
- Tap **Toggle**. It's in the lower-right corner of the `dom.disable_open_during_load` box. Doing so will set this item's value to "false", which you'll see appear in the bottom-left corner of the item's box. This will prevent pop-up windows from being blocked.
- Close and re-open Firefox. Once Firefox is open again, you should be able to view pop-ups.
